

# ANTI-MICROBIAL SAMPLE PACK

CALL: 01744 815 475

# INTRODUCTION

## Firstly, why have we developed the anti-microbial card?

Prevention, protection and peace of mind. That's it in a nutshell. Our customers are at the heart of everything we do so we asked ourselves, what can we do to better support them?

### Introducing the innovative anti-microbial card.

Now more than ever, the world is constantly searching for ways to be safer.

That's what this card does. The surface of the card provides permanent antibacterial protection to the spread and growth of a number of deadly bacteria on the surface of the card including Staph Aureus and E coli.

Independently tested at leading microbiology laboratories and proven to be 99.4% effective; it's a no brainer for any organisation looking to protect their staff, patients, customers and themselves.

The technology used complies with the Food & Drug Administration (**FDA**), Environmental Protection Agency (**EPA**) and Biocidal Products Regulation (**BPR**).

## WHAT CAN IT BE USED FOR?

- ID Badges
- Access Passes
- RFID Chip Tech Cards
- Membership Cards
- Business Cards
- Event Passes

## WHERE CAN IT BE USED?

- Hospitals & Medical Surgeries
- Care Homes
- Gyms & Leisure Facilities
- Schools, Colleges & Universities
- Public Services
- Offices

# BESPOKE PACKAGE

Now you've committed to the safest card around, there's no point in doing things half-hearted. Yes the card may be the star of the show but every star needs a supporting cast.

We can offer a full range of products to compliment your cards whilst maintaining the protection you need. This includes a variety of printed services complete with an anti-bacterial lamination that actively stops the spread of germs.

This can be added to any print requirements such as signage, leaflets to name a few. Even this brochure is anti-microbial.

Plus, to complete the full package you can match with anti-microbial card holders and lanyards to ensure a fully safe range whether it's for your staff, patients, customers or colleagues.

# BENEFITS OF WORKING WITH SWYPE

For nearly three decades, we've produced millions of customised, high quality cards for thousands of care organisations and look forward to personalising their identity for many years to come.

***Here's how we could help you;***

## **Short Run Specialist**

There's no minimum order quantity required whether its 10 cards or 10,000. With our unique position as a leading manufacturer of small run orders, we understand it's not a one size fits all.

## **Speed**

With average lead times of just 5 days from order to delivery, we're famed for our ability to meet the demands of our customers. Plus, with our express option, we can even produce and deliver your cards within 48 hours.

## Sustainability

We champion multi use plastic with an extensive product range offering eco friendly alternatives. With guaranteed quality across our all our cards, this ensures the cards last longer and can be reused multiple times.

## Expertise & Service

Over 75 years worth of card and print experience within our business through our highly skilled team. With a plethora of supporting services from studio design to print finishing, we have a complete experience all in one place.

## UK Manufacturer

One of the UK's true card manufacturers with a state of the art facility based on site. This includes digitally advanced technology ensuring rigorous checks and guaranteed quality products on time, every time.

## Security

With our manufacturing capabilities on-site, your data stays in-house throughout the full card journey. We also offer a number of card products designed to support security whether that's ID or access cards.
