PERSONALISING YOUR IDENTITY

# Join the Green Revolution

Eco-friendly products and plastic aren't two things you normally see together. As a business, we want to change that by helping our clients do more for the planet. We're committed to providing sustainable options as well as championing multi-use plastic. We do this by ensuring we use the highest quality material available to last for a long period of time.

With 100% degradable options available, we're on a mission to make this the range of choice.

## Embrace the Eco Movement

We offer two eco friendly products that are able to be used across all card types. Whether that's access cards for your new office building, membership cards for your restaurant or some ID passes for your summer festival.

Whatever the purpose of your cards, our eco range is completely versatile and offers a greener alternative than traditional plastic.

***We practice what we preach, and are committed to the following:***

### Carbon Capture

We're signed up to the Woodland Trust Carbon Capture scheme

### Recycling

Our waste is recycled and reused wherever possible

### Zero Landfill

We work with a Zero PVC To Landfill recycling facility

# Recyclable Eucalyptus Cards

We launched our ground-breaking product in August 2020. The product is 100% degradable and recyclable, making it the ultimate option for those looking to join the green revolution with a more eco-friendly approach.

Our premium eco product is the ultimate card for those businesses looking to improve their impact on the environment by fully committing to the cause. Due to growing customer demand, our Eucalyptus card has proved to be a huge hit with clients across the UK and further.

# Degradable Agave Cards

There's nothing standard about our 100% degradable eco card. Having produced and sold over 600,000 cards since launching in 2019, it has quickly become one of the most popular products in our range of cards.

As an affordable alternative to our eucalyptus card, both products offer versatility due to the material. We produce business cards, membership cards and loyalty cards in both formats, with features such as embossing, personalisation, gloss and fulfilment available.

## Here's what our customers say

***“The service and product was first class from start to finish. Leanne was fantastic at explaining the specification of the new eco card plus the benefits it could bring to my business.”***
